EXPERIENCE

Flutter Developer *Jiffy by Hurricane* { Android | iOS } Feb 2025 – May 2025
- Engineered cross-platform mobile application serving 500+ active users across Android, iOS, and Web
- Integrated Firebase services (Auth, Cloud Messaging, Firestore) enabling real-time notifications
- Optimized UI rendering with lazy loading and widget caching, reducing initial app load time by 40%
- Built push notification system handling 3 app states (foreground, background, terminated) for event and chat updates
- Expanded platform reach by 20% through flutter web with feature parity across devices

Webmaster *ACM-JUIT* Aug 2024 – July 2025
- Architected RESTful backend using Node.js and Express.js, processing 1000+ API requests during peak events
- Led cross-functional team of 10 developers across 5 production projects using Agile sprint methodology
- Migrated authentication system from Firebase to custom JWT implementation, reducing external dependencies
- Delivered 2 technical workshops on API design and backend architecture to 30+ chapter members
- Reduced project delivery time by 25% through structured sprint planning and code review practice

PROJECTS

Slacky API {GitHub} (Node.js, Express, PostgreSQL) Nov 2024 – Jan 2026
- Architected normalized database schema with 8 tables following 3NF principles for workspaces, projects, and tickets
- Built JWT-based authentication flow with refresh token rotation, securing 12+ API endpoints
- Created transaction-safe APIs using PostgreSQL for multi-table operations ensuring data consistency
- Established audit trail system tracking 100% of ticket status changes with immutable history logs

Omnia (ACM-JUIT) {GitHub} (Flutter, Node.js, Express, MongoDB) Jun 2024 – Aug 2024
- Developed RESTful API with 20+ endpoints for event registration, user management, and payment processing
- Structured MongoDB schema with 6 collections optimized for read-heavy workloads (event browsing, user profiles)
- Applied middleware pattern for request validation, authentication, and error handling across all routes
- Deployed to Render with 99% uptime, supporting 50+ concurrent users during registration windows
- Constructed role-based access control system with 3 user tiers (admin, organizer, participant)

EDUCATION

Jaypee University of Information Technology Solan, India
B.Tech in Computer Science and Engineering Aug 2022 – July 2026
CGPA: 8.12 (current)
- Strong foundation in Data Structures and Algorithms.
- Coursework includes Operating Systems, Database Management Systems, Object-Oriented Programming as well as Cloud Computing.

DAV Centenary Public School Haridwar, India
XII (PCM with CS): 85% | X: 90% 2022 / 2020

TECHNICAL SKILLS

Languages: Java, JavaScript (ES6+), Dart, Python, SQL, C++
Backend Technologies: Node.js, Express.js, RESTful APIs, JWT Authentication, Middleware Design
Databases: PostgreSQL, MongoDB, MySQL — Schema Design, Query Optimization, Transaction Management
Mobile Development: Flutter, Firebase (Auth, FCM, Firestore), Cross-platform Development
Tools & Practices: Git, Postman, Chrome DevTools, Agile, API Documentation, ADB (Android Debug Bridge)

ACHIEVEMENTS

- NCC C certificate (Alpha grade) — Rank : Under Officer —
- Demonstrated leadership managing a squad of 30+ cadets in field training and drill exercises 2025
- Major contributor in ACM app and backend development (50+ commits) 2024
- 2nd Place, Expanse 2.0 Hackathon 2023
